Skills

React

Javascript

Typescript

Redux

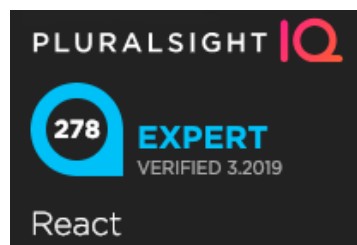

Webpack

Node.js

SQL Server

C#

MongoDB

11/18 - Now

Developer

Borderguru

Helped the team on improving our current solution, refactoring features from our legacy system into a more modern one using React on the frontend and Typescript on the backend.

02/17 - 09/18

Developer

Exact Sales

At Exact Sales, I took care of architecting the React front-end infrastructure, integrating it into our current stack and seamlessly switching between the old and the new frontend. Along with that, I also created and maintained components to take care of demands requested by the UX/Analysis team.

05/16 - 02/17

Developer

Paradigma

Working as a developer, I started to put into practice and improve knowledge already acquired, such as ASP.Net MVC, Entity Framework, SQL Server and Bootstrap and learned technologies i did not know about, such as ASP.Net Web Forms and Oracle.

08/14 - 05/16

Tester

Paradigma

After five months as an intern, I was given the opportunity to become a Tester Jr., performing test cases looking for imperfections and irregularities, taking into account the technical specification of the application, and also elaborating them to ensure that the application complied with both the company interface standards and the technical specifications of the application.

Education

2013 - 2017

**Bachelor degree in
Information Systems**

Estácio

I chose this course for being very broad, ranging from computer networks and programming, to information security and requirements engineering, which enabled me to have an overview of which areas I would have the most affinity and which ones I would like to embrace professionally.

Open-source Projects

[pipe-now](#)

A pipe function that tries to replicate the pipeline operator proposal.

[gd-scripts](#)

CLI with common scripts for my projects.

[semantic-release-chrome](#)

Set of semantic-release plugins for automating the process of publishing a Chrome extension release.

[copy-paste-component](#)

A tool to create components, by copying and pasting existing ones.

[copy-paste-component-vscode](#)

A visual studio code extension for you to create new components using "copy-paste-component".

[youtube-autoclose-ads](#)

Chrome extension to automatically close youtube ads after an amount of time.

[webplayer-hotkeys](#)

A Chrome extension that assigns hotkeys to play/pause, and switch musics (next and previous). Works with Spotify, Deezer, SoundCloud and Youtube

[deckstream](#)

[WIP] A mobile app that allows you to control your computer through configurable macros.

[generator-gd-scripts](#)

A generator to start up my projects
